Fax: + 30 2310 99 55 83 and 472 240

Url: [www.urenio.org](http://www.urenio.org)

Director: Prof. N. Komninos

*The Urban and Regional Innovation research unit* is a University Lab of Aristotle University of Thessaloniki for the promotion of applied research and the supply of technological services in the field of innovation ecosystems and intelligent cities.

**URENIO** is mainly involved in competitive projects of the European R&D framework programmes (FP), the CIP, the innovative actions of the ERDF, and the programmes of Interregional Cooperation.

- **UNIVERSITIES & RESEARCH INSTITUTES**  
CATHOLIC UNIVERSITY OF LOUVAIN; DEMOCRITUS UNIVERSITY; FOUNDATION FOR RESEARCH AND TECHNOLOGY; PANTEION UNIVERSITY; RESEARCH AND TECHNOLOGY INSTITUTE OF MAASTRICHT; TECHNICAL UNIVERSITY OF CRETE; TECHNICAL UNIVERSITY OF MILAN; UNIVERSITY OF MONTPELLIER; UNIVERSITY OF SOCIAL SCIENCES OF TOULOUSE; UNIVERSITY OF THESSALY; UNIVERSITY OF WALES, CARDIFF; UNIVERSITY OF LULEA; UNIVERSITY OF BREMEN; CNRS.

- **REGIONAL AUTHORITIES**  
BASQUE COUNTRY; CENTRAL MACEDONIA; IONIAN ISLANDS; NORTH RHIN WESTFALIA; LORRAINE; MANTOVA; SOUTHERN AEGEAN; SW OLTENIA, ROMANIA; THESSALY; WALES; W. MACEDONIA

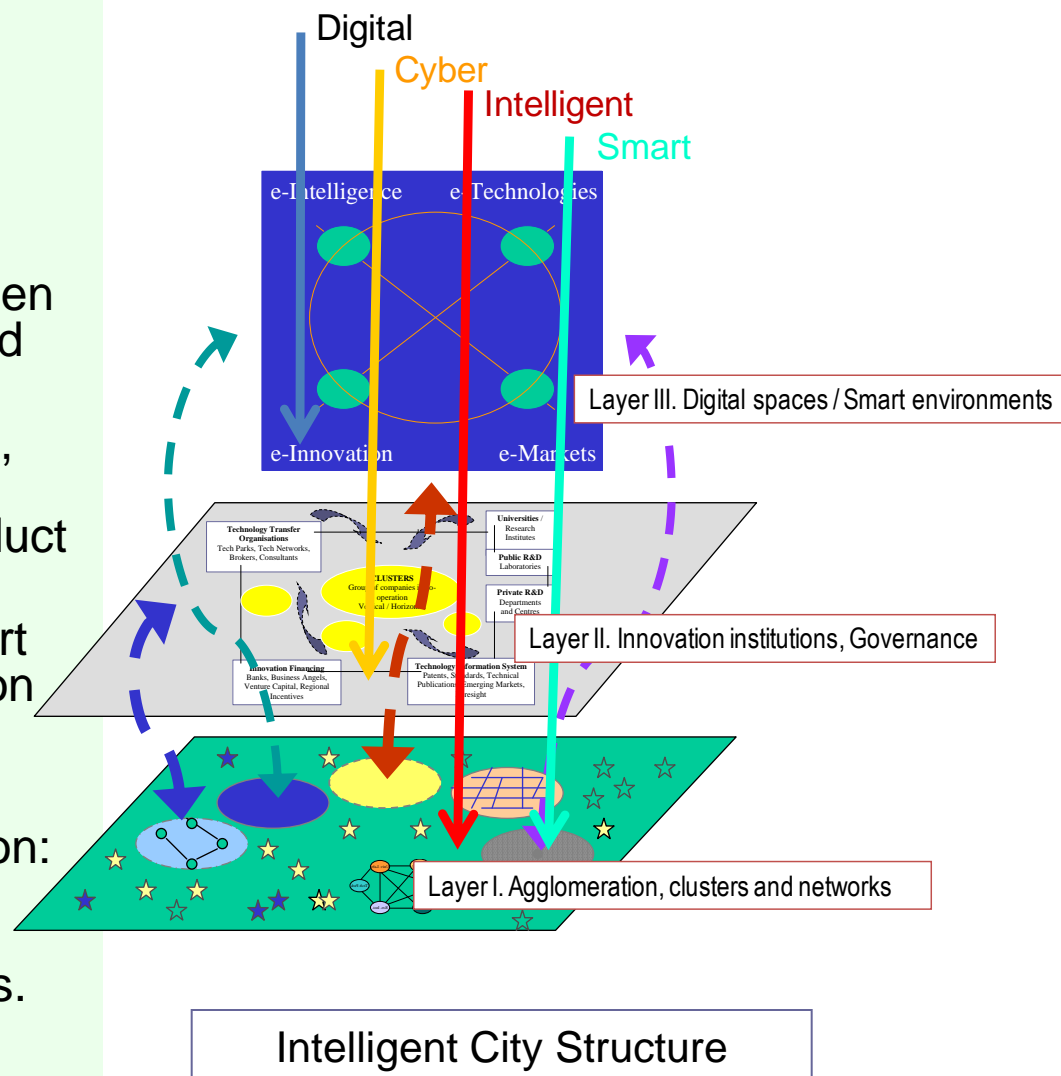

# Research field

URENIO's research focuses on **innovation ecosystems** and **intelligent cities**

We are working on

- Models of innovation ecosystems (technology districts, clusters, technology parks, RIS-regions, open innovation ecosystems, web-based ecosystems)
- Innovation processes (intelligence, technology transfer and learning, collaborative innovation, new product development), and
- Digital spaces, platforms and smart environments supporting innovation ecosystems.

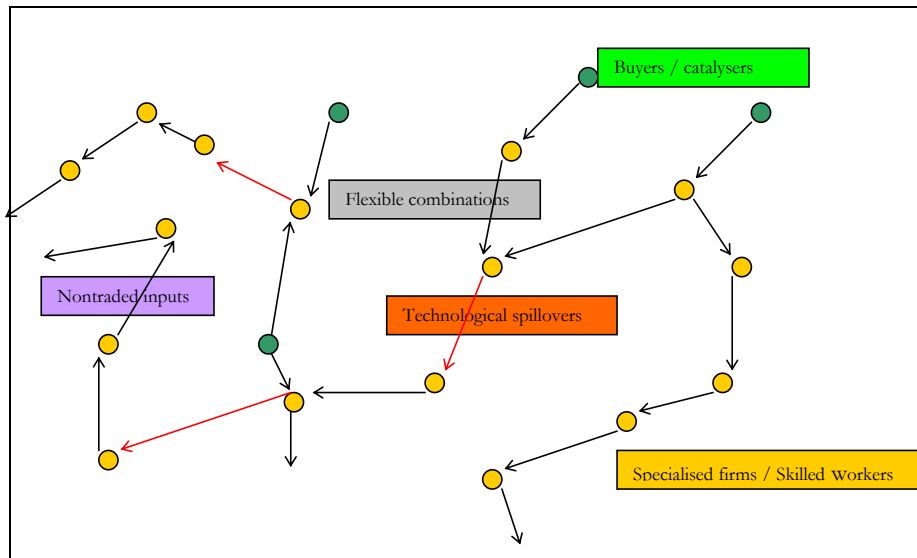

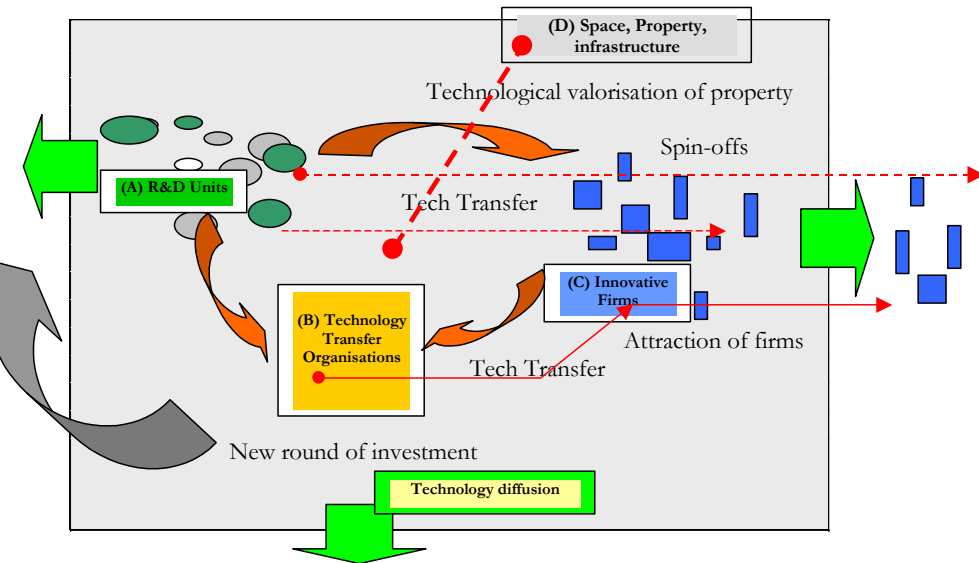

Research on intelligent cities focuses on:  
(1) strategies, (2) platforms and applications, (3) business models, and (4) measurement scoreboards.

# Research 90 projects from the EU and international organisations

# Research field 1: Innovation ecosystems development

Clusters; Technology districts; Technology parks; Incubators

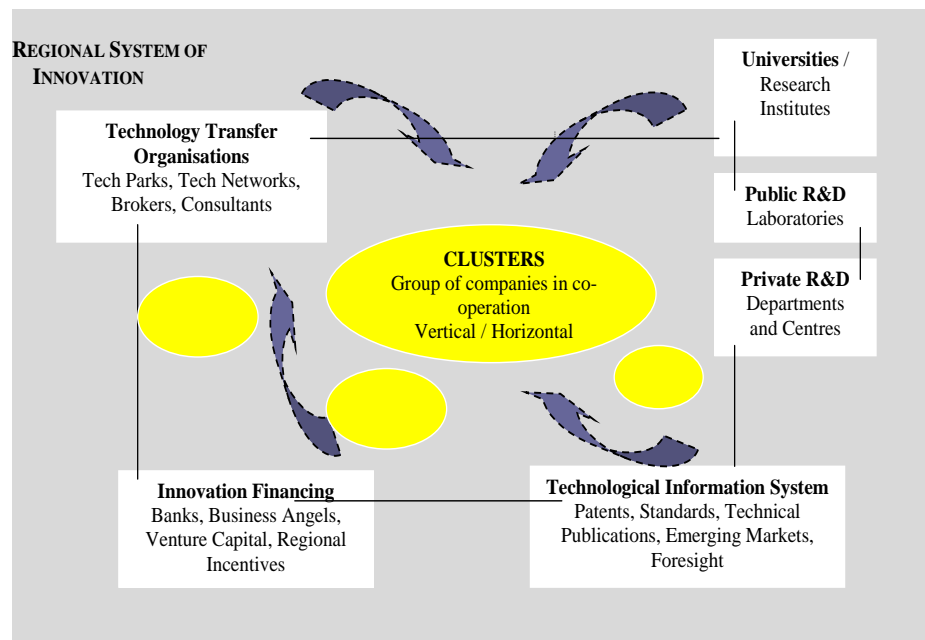

This topic covers projects dealing with the management, development and planning of innovation clusters, technology poles, science and technology parks, innovation centres, incubators.

## Projects

- Andalusia Technology Park
- Innovation Centre Belice, Italy
- Science Park, Technical Univ. Crete
- Science Park, Democritus Univ.
- Industrial Districts and System-areas in Greece
- Technology Transfer Centre (NETFORCE)

# Research field 2: Innovation strategy development

## RIS-RITTS projects; Cost-cutting strategies; Innovation measurement

### Thematic areas

Projects: Participation in 20 RIS/RITTS and ERDF Innovative Action Programs in Greece, Cyprus, Bulgaria, Lithuania, UK, Spain

METAFORESIGHT; STRATINC; Regional Innovation Observatories; RKM-Net; Regional Innovation Management (INNOREGIO); INNOTENDER; Spin-off management (TECHNOGENESIS).

**Greek BENCHMARKING Centre**  
Comparative evaluation for enterprises and institutions

Home | The Centre | The technique | For enterprises | For Regions | Certified Consultants

#### The technique of Benchmarking

It involves the comparative evaluation of technologies, production processes and products of a corporation /organization, compared to the leading organizations in the field. Benchmarking is achieved through carefully chosen indicators and allows the corporation to reorganize itself successfully, via an understanding of its strengths and weaknesses. [More >](#)

<b>Enterprises</b> On-line applications for company benchmarking: <ul style="list-style-type: none"> <li>Manufacturing</li> <li>Tourism</li> <li>Information Technology</li> </ul>	<b>Certification of Consultants</b> The benchmarking service for corporations is provided by a network of certified consultants.  The Greek Benchmarking Center organizes training workshops for the certification of consultants.
<b>Regions</b> Monitoring of regional performance in	

**The Centre**  
The Greek Benchmarking Center is an activity of URENIO research unit, which aims at popularizing Benchmarking in corporations and organizations. [More >](#)

**Other Organizations**  
**DTI - BenchmarkIndex**  
The Department of Trade and Industry in Great Britain has developed the BenchmarkIndex, a tool for the application of Benchmarking in businesses. BenchmarkIndex service is provided in Greece by the Greek

# Research field 3: Intelligent Cities

## Innovation ecosystems and Web technologies

This topic focuses on the use of information technology to create digital / smart innovation ecosystems within innovative and knowledge cities. We are working on the development of virtual innovation ecosystems, such as research centres, technology parks, industrial districts, and knowledge-based clusters.

Digital cities support the functioning and management of cities through information technologies and the Internet.

Projects: OnLine Innovation (ONLI); Digital Research Centre; Digital Corfu; Digital Aegean; Open Digital City Platform; FIREBALL, PEOPLE, INTERVALUE

Virtual Tech Park

Digital Research Centre

Cluster intelligence

# Activities in the field of intelligent cities:

## (1) Projects on Digital / Intelligent / Smart cities

# (2) Development of IT platforms / applications for intelligent cities

## Intelligent City Platforms

Intelligent cities are **systems of innovation** combining innovative clusters, technology learning institutions, and digital innovation spaces. The platforms enable the creation of digital spaces facilitating five key innovation processes.

### Intelligent City Platforms

- Strategic intelligence**, allowing to gather, analyze and disseminate information about technologies, markets, and competitors;
- Technology dissemination**, allowing to acquire and adapt existing knowledge;
- Collaborative innovation**, for creating networks of product design and new product development;
- New company creation**; and
- Online marketing** of products, promotion and delivery of services.

### Strategic intelligence

The Strategic Intelligence platform supports researchers, innovators, and entrepreneurs in finding relevant information, connecting with others, and addressing their needs. It provides a central hub for information, analysis, and dissemination. Key features include:

- Advanced search capabilities
- Customized content recommendations
- Collaborative tools
- Real-time updates
- Integration with external data sources

### Technology Dissemination

The platform supports the dissemination of technology and innovation. It provides a central hub for information, analysis, and dissemination. Key features include:

- Advanced search capabilities
- Customized content recommendations
- Collaborative tools
- Real-time updates
- Integration with external data sources

### Collaborative Innovation

The Collaborative Innovation platform supports researchers, innovators, and entrepreneurs in finding relevant information, connecting with others, and addressing their needs. It provides a central hub for information, analysis, and dissemination. Key features include:

- Advanced search capabilities
- Customized content recommendations
- Collaborative tools
- Real-time updates
- Integration with external data sources

### New Company Incubation

The New Company Incubation platform supports researchers, innovators, and entrepreneurs in finding relevant information, connecting with others, and addressing their needs. It provides a central hub for information, analysis, and dissemination. Key features include:

- Advanced search capabilities
- Customized content recommendations
- Collaborative tools
- Real-time updates
- Integration with external data sources

### Virtual Tour & e-Market

The Virtual Tour & e-Market platform supports researchers, innovators, and entrepreneurs in finding relevant information, connecting with others, and addressing their needs. It provides a central hub for information, analysis, and dissemination. Key features include:

- Advanced search capabilities
- Customized content recommendations
- Collaborative tools
- Real-time updates
- Integration with external data sources

## Strategic Intelligence

Applications which support information mastering. They are structured according to business intelligence principles, and include data collection, data analysis, and data dissemination modules, enabling the provision of market and technology watch services.

## About INTELSPACE S.A.

INTELSPACE offers consulting services and software development in the fields of innovation, digital innovation environments, and intelligent cities. We focus on the design and development of physical and virtual environments assisting key innovation processes, such as strategic intelligence, technology transfer, new product development, and online product promotion.

Innovation environments accelerate the cycle of innovation from the conception of a new idea to the creation and promotion of a new product to the market. They operate within companies, research institutes, incubators, technology parks, clusters, and other innovative agglomerations. They are assisted by digital spaces and IT applications, such as web-based intelligence for information processing; virtual communities for innovation collaboration; online technology transfer platforms; web-based marketplaces and digital cities for product marketing and promotion.
